

# Platinum Resistance Thermometer Simulation

**Model 1146-Pt100**

**Model 1144-Pt100**

**Model 1144-Pt500**

**Model 1144-Pt1000**

Code: 1144-Pt EN

Delivery: ex stock

Warranty: 24 months

1144-Pt EN

- TK ≤ 10 ppm/K
- More than 60 fixed temperature values from - 200 °C ... + 800 °C ex stock
- Calibration in acc. with DIN EN 60751
- ± 0.02 % tolerance for the models 1144-Pt 100, 1144-Pt 500 and 1144-Pt 1000
- ± 0.05 % tolerance for model 1146-Pt100
- Resistance material MANGANIN®

## Application

Today resistance thermometers are one of the important precision and operating measurement instruments of technical temperature measurement. Fast and easy testing of display, control and recording devices in measurement and process engineering is essential. Fixed temperature values can easily be simulated according to the characteristic curves of Pt100, Pt500 and Pt1000 using the precision resistors calibrated in °C (the inscription also includes the resistance value in Ω).

The small dimensions of the resistors allow the installation in measuring instruments or measuring circuits for comparison or control measurements.

Consideration of the ambient temperature is not necessary and the temperature coefficient of < 10 ppm of the used material MANGANIN® is negligible.

## Description

The precision resistors of the models 1144 and 1146 consist of low-capacity and low-inductance wire coils made of MANGANIN®, which are cast in small plastic cylinder housings.

Prior to comparison, the resistance bodies are exposed to a meticulous artificial aging procedure. This special method and comparison at approximately only half of the nominal tolerance guarantee long-term stability of < 0.02 % over the course of years.

**Technical Data**

Resistance material:

MANGANIN®

Temperature coefficient:

≤ ±10 ppm/K

Error tolerance:

model 1144 ± 0.02 %

model 1146 ± 0.05 %

Balance temperature:

23 °C

Balance point:

for connecting wire of 5 mm length

Temperature range:

- 200 ... + 800 °C

Basic values:

calibrated acc. to DIN EN 60751

Coil design:

graduated coil according to Chaperon

Long-term stability :

&lt; 0.02 % over years

Operating voltage:

max. 500 V

Temperature range:

0 °C ... 85 °C

Temperature dependence:

 $R_t = R_{20} [1 + \alpha_{20} (t-20) + \beta (t-20)^2]$  $\alpha_{20} = 0 \dots 20 \cdot 10^{-6}$  $\beta = -0.59 \cdot 10^{-6}$ 

Short-time load:

approx. 10 % &lt; 1 min

Ultimate load: 0.7 W up to 25 °C environmental temperature

Surface temperature: max. 85 °C

results from heat dissipation and environmental temperature

Thermal resistance: 90 K/W

Specifications: according DIN 43783, part 1 (former VDE 410)

Weight: ca. 3 g

**Dimensions [mm]****Minimum order quantity:**

Standard values:

10 pcs (can be mixed)

Special values: 10 pcs (of identical version)

Delivery: approx. 4 - 6 weeks

**Order Code**

7 pcs Model 1146-Pt100 - 100 °C

10 pcs Model 1144-Pt100 + 100 °C

12 pcs Model 1144-Pt500 + 50 °C

17 pcs Model 1144-Pt1000 + 150 °C
